🔗 Portfolio 🌐 LinkedIn 🏠 Github

Profile

Software Engineering graduate from SLIT with hands-on experience in full-stack development. Proficient in Spring Boot, MERN stack, Laravel with a strong foundation in OOP concepts, database management, and secure application deployment. Experienced in microservices architecture, cryptography, and machine learning implementations. Seeking a Software Engineer position to contribute to innovative software solutions.

Professional Experience

One Billion Technology 04/2025 – Present | Colombo

- Contributed to a large scale Java based microservices architecture hosted on AWS EC2.
- Implemented and optimized the Google Calendar integration using the Google Calendar API, improving scheduling reliability and user experience.
- Developed an AI powered chatbot (“Spacey”), gaining hands-on experience in Machine Learning and AI model while improving customer support automation.
- Developed an AI powered ticketing system for the 1BT Prompt & Conquer hackathon

Softmint Software Solutions 02/2024 – 10/2024 | Colombo

- Optimized SQL queries and improved database performance. Specialized in creating scalable and secure backend services using Laravel, focusing on database management and API integration.

Education

BSc (Hons) in Information Technology specializing in Software Engineering, SLIIT 2021 – 2025 | Malabe

GCE Advanced Level (A/L) - Physical Science Stream, 2020
Maliyadeva College

Technical Skills

Programming Languages

Java, JavaScript, PHP, C, C++, C#, Python

Backend Technologies

Spring Boot, Node.js, Express.js, Laravel, FastApi, Flask

Version Control

Git, GitHub, Bitbucket

Cloud Platforms

AWS(EC2,S3 Bucket), DigitalOcean

Machine learning and Deep Learning

State management

Redux

Frontend Development

ReactJS, NextJS, HTML 5, Tailwind CSS, Bootstrap, SEO

Database Management

MySQL, MongoDB, MSSQL, Firebase, PostgreSQL

Development Tools

IntelliJ IDEA, Visual Studio, Docker, Kubernetes, CI/CD, Postman, Swagger, Figma

Testing & QA

Manual Testing, API testing

Agile, Jira

Projects

Million Spaces (platform to book co-working spaces),

04/2025 – Present

Associated with One Billion Technology

React | Spring Boot | MongoDB | Bitbucket | Postman.

MillionSpaces is comprehensive coworking spaces booking platform. I am working as full stack developer utilizing Spring Boot, React, and MongoDB, with cloud deployment and management on AWS

Stores Management System,

11/2024 – present

Associated with Survey department of Sri Lanka

Laravel | Filament | MySQL

Collaborated on the development of a comprehensive system to manage procurement, tenders, employees, and equipment across the country. The system streamlined operations by centralizing data, improving transparency, and ensuring efficient resource management for the department.

Blockchain based e-voting system, Group Research Project

08/2024 – 06/2025

Blockchain | NextJs | MongoDB | Machine Learning | Homomorphic encryption | Docker

My final year research focuses on ensuring secure voting and data integrity using homomorphic encryption for encrypted vote tabulation and blockchain for verifying vote integrity

Chat bot, Personal Project

04/2025 – 05/2025

RAG | LLM | Langchain

This chatbot is designed to answer questions based on lecture notes, making it a useful study companion. Used RAG with LangChain to connect an LLM with a document retrieval system. The bot pulls relevant info from course materials to give accurate answers - pretty handy for studying.

Tour management system,

04/2024 – 08/2024

Associated with Softmint Software Solutions (PVT) Ltd

Laravel | React | MySQL

Contributed to the development of a centralized admin panel for managing hotel, activity, and tour bookings, resulting in streamlined operations. Integrated the custom admin panel with the existing WordPress Advanced Database Structure, ensuring seamless data synchronization and comprehensive management capabilities for booking records.

Soft Skills

Teamwork

Worked effectively with others using Git, Agile, and Scrum.

Problem-Solving

Able to identify issues, analyze root causes, and implement practical solutions.

Adaptability

Quick to learn and adjust to new tools, technologies, and environments.

Time Management

Managed studies and projects by setting clear priorities.
